Exploring Loneliness, Social Support and Adaptability of International Students in Canada during COVID-19

Published On: December 13, 2024 | Pages: 028 - 040

Author(s): Chang Su* and Gordon L. Flett

Background: The global COVID-19 pandemic has had extraordinary adverse effects, negatively impacting people's physical health, mental health, and well-being. Measures such as quarantine, lockdown, and social distancing have exacerbated social isolation, loneliness, and mental health challenges. International students, as a particularly vulnerable population, confronte ...

The Analysis of Criminogenic Factors in a Sample of Drug Addicts: The Relevance of the Social -Environmental Element in Antisocial Behavior. Pilot Study

Published On: October 15, 2024 | Pages: 021 - 027

Author(s): Domenico Piccininno and Giulio Perrotta*

Introduction: Behavior is the consequence of cognitive processes that originate from multifactorial products, such as genetic predisposition, education received, and experience gained from the family and social context of reference. The deficiency or defect of one or more of these factors could cause psychopathological shaping in the individual that can foster or nurt ...

Evaluation of the treatment outcome of tibia shaft fracture by close reduction and

internal fixation with interlocking intramedullary nail, Freetown, Sierra Leone, 2023

Published On: March 28, 2024 | Pages: 011 - 020

Author(s): Desmond Maada Kangbai*, Nella Clemens-Kangbai and Isaac Olufemi Smalle

Introduction: The tibia shaft is a common site for bone fractures and open fractures. Tibia shaft fracture is mostly caused by high-energy trauma such as a fall from a height or a road traffic accident. The objective of this study was to evaluate the treatment outcome of tibia shaft fracture managed by close reduction and internal fixation with interlocking Intramedul ...

Investigating the cause of limb amputation in physical rehabilitation reference center

Published On: February 12, 2024 | Pages: 001 - 010

Author(s): Lochoroi Adam Henry*

South Sudan, the newest African nation where firearms are owned almost by all men has always been experiencing waves of conflict since independence. Egypt which tried to colonize the country in the 1870s divided it into regions with Equatoria where the country’s capital city is located has always been a combat zone. Since then several firearms have continued to be use ...
