A Review on Therapeutic Management of Chronic Hepatitis B Infection

Published On: August 28, 2015 | Pages: 020 - 034

Author(s): Mugilan Poongkunran* and Asad Javaid

The current therapeutic goal in the management of chronic hepatitis B (CHB) infection is to persistently suppress hepatitis B virus (HBV) replication and prevent its progression to liver failure and the development of hepatocellular carcinoma (HCC). At present, the therapeutic strategies for CHB includes either a short course of pegylated-interferon-alfa (PEG-IFNa) an ...

Mediastinal Tuberculosis Lymphadenitis during Anti-TNF Therapy - Case Report

Published On: October 14, 2015 | Pages: 038 - 040

Author(s): Bruno Cesar da Silva, Fabio Carneiro Vosqui Nascimento, Sonyara Ruedys Oliveira Lisboa, Eduardo Antonio

Gonçalves Ramos, Valdiana Cristina Surlo, Tatiana Senna Galvão Nonato Alves and Genoile Oliveira Santana

Tuberculosis is described during the use of monoclonal antibodies against tumour necrosis factor (TNF) for Crohn's disease treatment. We report a case of a 44 year old man that developed fever, night sweats and weight loss during immunosuppressive and anti-TNF therapy for Crohn's disease. After extensive investigation we performed mediastinoscopy with biopsy of the pa ...

Helicobacter pylori Infection and Hematologic Disorders: what do We Really Know?

Published On: September 09, 2015 | Pages: 035 - 037

Author(s): Bruna Maria Roesler*

One of the most important events on gastroenterology certainly was the isolation of *Helicobacter pylori* (*H. pylori*) by Barry Marshall and Robin Warren in 1983 [1], occurrence which redirected our understanding of the pathophysiology of gastrointestinal diseases. The production of urease as well as the mobility of these bacteria promoted by flagella were identified as ...
