Epidermoid Cyst arising within an Intrapancreatic Accessory Spleen [ECIPAS] mimicking a pancreatic mucinous cystic neoplasm-a case report with literature review

Published On: July 02, 2024 | Pages: 010 - 018

Author(s): Pramath Kakodkar, Dana Diudea and Rani Kanthan*

Background: Accessory spleens are congenital embryological aberrations usually found within the splenic hilum with no clinical significance. An Intra Pancreatic Accessory Spleen (IPAS) is an uncommon benign pancreatic lesion encountered clinically. The occurrence of an Epidermoid Cyst arising within an IPAS (ECIPAS) is exceedingly rare and is often misdiagnosed as a p ...

Primary retroperitoneal paraganglioma mimicking gastric GIST: Case report

Published On: May 31, 2024 | Pages: 007 - 009

Author(s): Abdelilah El-Bakouri, Kabira Falousse*, Siham Elkinani, Mounir Bouali, Khalid El-Hattabi, Fatima Zahra Bensardi and Abdelaziz Fadil

Introduction: A paraganglioma is a tumor originating from the sympathetic or parasympathetic nervous system. Its diagnosis is sometimes difficult, especially if it occurs in an atypical location. We report the case of a patient who presented with a diagnosis of gastric GIST and underwent surgical resection and whose postoperative histopathological examination revealed ...
