Regional Development of Postpartum Care Services and Centers Utilizing Institutional Features of the Japanese-style Neuvola System: A Comparative Analysis of a Metropolitan, a Mid-sized, and a Small Municipality

Published On: February 24, 2026 | Pages: 001 - 007

Author(s): Nobuko Sekinaga*, Hiromi Tamura and Naoko Naitou

Purpose: This study comparatively analyzes postpartum care programs in three municipalities of different sizes from the perspective of the Japanese-style Neuvola to examine ideal regional support systems. Research method: A comparative policy study through a literature review based on official and public documents from each municipality. Results: City A features a ...
