State of Art Update: Detection and Classifi cation of Early Colonic Neoplasia

Published On: March 24, 2017 | Pages: 021 - 026

Author(s): K McWhirter, R George and Y Ang*

Colonoscopy has been shown to be effective in the detection and removal of precancerous lesions and early cancers, and as a result, colorectal screening programs are in preparation, or in place throughout the world. Screening efforts are reducing the incidence of colorectal cancer (CRC) and allow diagnosis CRCs at an earlier stage. ...
