Portal vein septic thrombosis secondary to complicated appendicitis: Case report

Published On: August 27, 2018 | Pages: 023 - 025

Author(s): Jacqueline Vasconcelos Quaresma*, Igor Mizael da Costa Saadi, Rafael José Romero Garcia and Leanne Isadora Vasconcelos Quaresma

Background: Portal vein septic thrombophlebitis is a rare and serious event of late diagnosis and secondary to intra-abdominal infection. Case report: A 21-year-old man was admitted to the hospital with loss of weight, fever, chills, hepatosplenomegaly, and history of abdominal pain in the right iliac fossa previously treated with ciprofloxacin. At the entrance phys ...
