More than a common acid buffering in the treatment of Non-Erosive GERD-like Clinical Spectrum: A Chios Masthia-based Formulation with (Cyto) Protecting Effect

Published On: February 26, 2019 | Pages: 003 - 010

Author(s): Barreto R, Todai M, Kumar N, Hayakawa K, Marotta F*, Imaoka Y and Catanzaro R

The aim of this study was to test the clinical and mucosal benefit of a natural gastro-oesophageal mucosal protector DOGDG-121 in non-erosive GERD comprising from NERD, to Functional Heartburn and Hypersensitive oesophagus while also ascertain the symptom-free duration in patients with prior symptomatic relapsing GERD. 68 consecutive adult patients, reporting mild hea ...

Unusual association of two rare entities: Primary rectal linitis and Klippel-Trenaunay syndrome

Published On: January 17, 2019 | Pages: 001 - 002

Author(s): Haraki I*, El Yazal S, Ait Errami A, Lairani FZ, Jiddi S, Samlani Z, Krati K and Oubaha S

Klippel-Trenaunay syndrome (KTS) is a rare congenital disorder, characterized by the triad of vascular malformations (angioma), venous and or lymphatic malformations and asymmetrical disturbed growth of soft tissues and/or bone. Primary rectal linitis is a rare digestive tumor with very poor prognosis. We report the case of a 41-year-old patient with Klippel trenaunay ...
