Gastroprotection and mucus stimulation by vitamin D3 in pyloric ligation and Indomethacin-induced gastric ulcers rats models

Published On: September 20, 2021 | Pages: 064 - 070

Author(s): Harrison Oghogho Otamere and Uwaifoh Akpamu*

The effect of vitamin D3 (VD3) on gastric ulcers was investigated by evaluating ulcer index, biochemical aggressive, and protective factors. Rats were divided into 4 groups; untreated indomethacin ulcer, VD3 pre-treated + indomethacin ulcer, untreated pyloric-ligation ulcer and VD3 pre-treated + pyloric-ligation ulcer. Treatment with VD3 (400 IU/kg intramuscular) was ...

Unusual association of cirrhosis and sickle cell anemia revealed by hemolytic anemia: A case report

Published On: October 19, 2021 | Pages: 075 - 077

Author(s): A Jallouli*, M Michouar, N Laghfiri, A Ait Errami, S Oubaha, Z Samlani and K Krati

Hepatobiliary complications of sickle cell disease are rare, cirrhosis remains very exceptional, especially in heterozygous forms of the disease. We report the case of a 19-year-old patient whose etiologic investigation of hemolytic anemia revealed heterozygous sickle cell disease complicated by hepatic cirrhosis. The diagnosis of cirrhosis was made due to the presenc ...

Liver metastasis from an ovarian Yolk-Sac-Tumor: A case report and review of the literature

Published On: October 08, 2021 | Pages: 071 - 074

Author(s): Aboutarik Fatima Ezzahra*, Michouar Maroua, Ait Errami Adil, Oubaha Sofia, Samlani Zouhour and Krati Khadija

The endodermal sinus tumor or Yolk sac tumor is a rare ovarian tumor that classically occurs in adolescents and young women, it is a histological type rarely found in clinical practice. We report the case of a 24-year-old woman presenting with an ovarian tumor of the endodermal sinus with hepatic metastasis revealed by a painful abdominal mass in the right hypochondri ...
