Pneumocystis Jirovecii pneumonia Infection in Immune Compromised Patients, Revisited

Published On: March 14, 2025 | Pages: 001 - 007

Author(s): Wael Lateef Jebur* and Ahmed Halawa

A fungal infection, *Pneumocystis jirovecii* pneumonia (PJP) primarily affects immunocompromised individuals, particularly post-transplant patients, leading to high morbidity and mortality rates. This review covers the pathology, risk factors, clinical presentation, diagnostic methods, prophylaxis, and treatment of PJP, with a focus on its implications in kidney transpl ...
