Attention to the problem of the inaccurate testing caused by virus mutation strains in clinical laboratory settings

Published On: February 09, 2017 | Pages: 001 - 002

Author(s): Gao Yulu*

A few virus strain mutations for many viruses can cause the problem of the inaccurate testing in clinical laboratory settings. Therefore, we put forward the following strategies and recommendations including re-examination using different methods or a comparative study or a parallel control study by different kits, and performing virus nucleic acid sequencing analysis ...
