Molecular-Genetic Technologies and their places in the Ethyological Diagnosis of the Infectious Combination of Bronchial Asthma

Published On: November 15, 2019 | Pages: 001 - 007

Author(s): Oksana Kukalo*

The development of the Polymerase Chain Reaction (PCR) method and the implementation of realtime PCR multiplex molecular genetic technologies in the laboratory practice of diagnosing infectious viral diseases have allowed faster and high-sensitivity to detect different etiopathogens directly in clinical specimens. ...
