Coronavirus (COVID-19) pandemic: Outbreak, current scenario and impact on human physiology in Pakistan

Published On: April 01, 2021 | Pages: 021 - 029

Author(s): Komal Jabeen, Muhammad Basit Husnain Haider, Zeshan Haider, Ali Hassan, Sultan Ali* and Adnan Khan Niazi*

Coronavirus that is also known as COVID-19 disease is produced by SARSCoV-2. This causative agent is highly contagious and can cause potentially fatal pneumonia worldwide with serious public health concerns. In the beginning among infected individuals, most of them were those who were mainly shown to the wet animal market in a big city of China known as Wuhan. So, it ...
