Low CD4+ T Cell count among HIV-seronegative Type 2 Diabetes Mellitus patients in Ilorin metropolis

Published On: February 17, 2024 | Pages: 001 - 008

Author(s): Ayodele O Ilesanmi*, Tihamiyu A Atanda, Rose Ilesanmi, Tolulope J Ogunniyi and Waheed A Akinleye

Background and aims: Diabetes Mellitus (DM) is a metabolic disorder that manifests as chronic hyperglycemia accompanied by a dysfunctional metabolism of carbohydrates, lipids, and proteins. Several studies have earlier pointed out several complications associated with the disease and in particular, the sufferer's susceptibility to various infectious diseases. We there ...
