Perioperative mortality of pediatric surgical patients in a developing country: Incidence and Etiology

Published On: February 17, 2021 | Pages: 001 - 005

Author(s): Chukwubuike Kevin Emeka*

Background: Pediatric perioperative mortality is a measure of the quality and safety of surgical care in children. The aim of study was to evaluate the incidence, etiology and pattern of pediatric perioperative mortality (within 24 hours and within 30 days post-surgery) in a teaching hospital in Enugu, Nigeria. Methods: This was a retrospective (STROBE) study of chi
