## Posttraumatic Anosmia Secondary to Cranial Base Contusion

Published On: July 24, 2014 | Pages: 010 - 011

Author(s): Shinji Makino\*, Nobuko Makino

Head trauma is a common cause of anosmia; however, the diagnosis is typically late, owing to greater attention being given to the more life-threatening sequelae of the injury. Studies have cited olfactory dysfunction as occurring in approximately 30% of all head traumas [1]. A 19-year-old woman presented with olfactory disturbance after suffering a cranial base fra ...

## A Painful Case of Debilitating Cutaneous Psoriasis

Published On: July 03, 2014 | Pages: 006 - 009

Author(s): Khurram Bilal Tariq\*, Farhangi Arezo, Rana Fauzia

Psoriasis is an immune mediated, chronic inflammatory, incurable condition of the skin that affects 2-3% of the population globally. It is associated with red, thick, scaly lesions [1], is more common in patients on higher latitudes, in Caucasians and may manifest itself with an underlying arthropathy. Psoriasis has a spectrum of presentations ranging from localized, ...

## Isolated Right Testicular PAN (Polyarthritis Nodosa) presenting as Right Testicular Pain

Published On: July 03, 2014 | Pages: 003 - 003

Author(s): Khurram Bilal Tariq\*, Arezo Farhangi, Fauzia Rana

Patient is a 30 year old male with no significant past medical history who repeatedly sought medical attention for debilitating right testicular pain. Initially he was symptomatically treated with non-steroidal anti-inflammatory medications for presumptive diagnosis of testicular trauma. A few months later he went to different emergency department and was treated with ...
