## Vildagliptin-Metformin: Is it a causative of cardiac muscle failure in Type 2 Diabetic patients?

Published On: September 24, 2021 | Pages: 001 - 002

Author(s): YRKM Sai\*

Vildagliptin is an oral anti-hyperglycaemic agent, commonly called an anti-diabetic medication that belongs to the family of medications known as Dipeptidyl Peptidase-4 (DPP-4) inhibitors. It is a medicine that is used to treat Type 2 Diabetes Mellitus [1]. ...
