Emergence of New Behaviors in Autism Spectrum Disorder: A Conceptual Framework for Understanding and Supporting Behavioral Change

Published On: October 06, 2026 | Pages: 028 - 042

Author(s): Mahbod Sahebi*, Jesper Thorell, Parisa Azizi and Jessica Patriciadotter

Purpose: The emergence of new behaviors in autism spectrum disorder (ASD) presents ongoing challenges for caregivers and clinicians, particularly in individuals with limited verbal communication. This paper aims to reframe such behaviors as meaningful expressions of underlying needs and to propose a structured conceptual framework for understanding and responding to b ...

Cholera: Determinants of the Disease and Prospects for Control in the Congo-Ubangui River Corridor in the Republic of Congo

Published On: June 02, 2026 | Pages: 017 - 027

Author(s): Medard Amona*, Yolande Voumbo Matoumona Mavoungou, Tatia Adoua Doukaga, Martin Ekat, Albert Mabiala, Michel Mankou, Hama Nemet Ondzotto, Armel Itoua, Gilius Axel Aloumba, Guy Roger Kinouani, Riha Lena Okamba Afissofo, Stevie Loundou, Albert Boungou, Jean Médard Nkankou, Guy Abel Bongo, Roland Bienvenu OSSIBI IBARA and Pascal Ibata

A major public health threat along the Congo-Ubangui river corridor, cholera is exacerbated by inadequate sanitation infrastructure and high population mobility. Our study analyzes the determinants of the disease in these riverside areas with a view to developing integrated control strategies. A descriptive and analytical cross-sectional study was conducted from Marc ...

Stevens-Johnson Syndrome and Toxic Epidermal Necrolysis Reactions to Ibuprofen and Acetaminophen: Clinical, Laboratory Assessment Using In Vitro Lymphocyte Toxicity Assay to Personalized Therapy

Published On: May 01, 2026 | Pages: 001 - 016

Author(s): Neuman Manuela*, Salisbury Roger and Misha Montfort

Introduction: Stevens-Johnson Syndrome (SJS) and Toxic Epidermal Necrolysis (TEN) are serious cutaneous adverse reactions (SCARs). SJS is defined when 10% of the body's skin is involved. When epidermal detachment involves 30% or more, it is called TEN. The syndrome affects 1-12 cases per million patients. The risk of death for SJS is 5-10%, and for TEN, 25% -50%. We u ...
