Translational movement of the eyeball under the influence of an air impulse

Published On: April 19, 2023 | Pages: 001 - 003

Author(s): Chigarev AV and Mikhnovich MO*

The study of the biomechanics of the eye is important for understanding the mechanisms of its functioning and the causes of the development of pathologies. New knowledge helps to better diagnose a number of diseases and develop effective methods for their treatment. The theoretical results obtained can give impetus to new research in this area. In this paper, the di ...
