High Reproductive Risk and Contraception

Published On: May 02, 2025 | Pages: 006 - 010

Author(s): Alexander Porter Magaña, Suria Denisse Soriano León, and Víctor Manuel Vargas Hernández*

Background: Patients with high reproductive risk have important risk factors for the development of complications, including maternal death. Rejection of contraceptive methods is influenced by biological, cultural, and social factors.

Objective: Identify the main sociocultural and demographic factors associated with not choosing a contraceptive method in women at hig ...

Dysbiosis as a Risk Factor for Endometriosis: A Synthesis of Systematic Reviews and Meta-analyses

Published On: April 01, 2025 | Pages: 001 - 005

Author(s): Viviane Cavalcanti Lins*, Gilvandro Lins, Leticia Vanderlei, Maria Beatriz Ferreira, Larissa Azevedo, Virginia Cavalcanti and Carolina Bandeira

Introduction: Endometriosis is a chronic inflammation that represents one of the most common benign gynecological diseases. It is a condition in which endometrial-like tissue grows outside the uterine cavity, implanting itself in tissues and organs, causing pelvic pain, dysmenorrhea and infertility. The increase in Escherichia coli and bacterial endotoxins are associa ...
