Managing vomiting in the third trimester of pregnancy during fixed prosthodontic treatment. A case report and review of the literature

Published On: January 27, 2022 | Pages: 007 - 013

Author(s): Spyridon Stefos* and Theodor Stefos

Pregnancy is a specific and critical period in a woman's life. Some pregnant women face difficulty when performing effective oral hygiene care due to pregnancy-related vomiting symptoms. A hypersensitive vomit reaction in the third trimester of pregnancy is not frequent and may prevent the dental provider from successfully completing critical clinical stages resulting ...
