Uterine Perforation with Bowel Herniation and Gangrene following Manual Vacuum Aspiration: A Case Report

Published On: July 16, 2025 | Pages: 005 - 008

Author(s): Ningi AB* and Abdulkadir I

Uterine perforation is an uncommon but serious breach of the uterine wall, which may rarely progress to bowel herniation—a life-threatening condition where intestinal loops protrude into the uterine cavity or pelvis. It is primarily a gynecological problem that often requires the intervention of a general surgeon. Most cases are iatrogenic occurring during Intrauter ...
