Divided Total Thyroidectomy with Medial to Lateral Dissection

Published On: June 06, 2026 | Pages: 005 - 007

Author(s): Ahmed E Lasheen*, Ahmed Farag, Tamar Wasefy, Alaaelden Ramadan, Amr Foad, Said Nagm and Omar A Lasheen

Background: Traditional total thyroidectomy is still associated with serious complications, especially when abnormal recurrent nerve anatomy is present. In divided thyroidectomy, dissection is started from medial to lateral, saving every structure passing through the thyroid gland or from it. Methods: Our study included 20 patients suffering from multinodular goiter ...

Left Colon Surgery in Adults: Indications, Surgical Procedures and Complications in Douala, Cameroon – A Multicenter Retrospective Study

Published On: January 28, 2026 | Pages: 001 - 004

Author(s): Jean Paul Engbang*, Basile Essola, Pierre Valery Onana Mvondo, Fred Dikongue Dikongue, Ambroise Ntama, Daril Dona and Marcelin Ngowe Ngowe

Background: Left colon surgery represents a major component of digestive surgical practice worldwide, with colorectal cancer being the leading indication. In sub-Saharan Africa, delayed presentation and emergency surgery remain frequent, potentially influencing postoperative outcomes. Objective: To describe indications, surgical procedures, postoperative complication ...
