Surgical management of an elderly patient with strangulated inguinal hernia and cryptorchidism: A case report

Published On: December 30, 2023 | Pages: 015 - 017

Author(s): Med Dheker Touati*, Mohamed Raouf Ben Othmane, Firas Jaouad, Fahd Khefacha, Anis Belhadj, Ahmed Saidani and Faouzi Chebbi

Cryptorchidism, the condition of undescended testicles, and inguinal hernia share a common embryological origin, often presenting together. This case report describes the surgical intervention for a 73-year-old diabetic male with a 20-year history of left inguinal hernia and a single right testicle. The patient presented to the emergency department due to obstructed i ...

A rare occurrence: A case report of acute appendicitis and omental infarction unveiled by epigastric pain in a heavy smoker

Published On: November 17, 2023 | Pages: 009 - 012

Author(s): Med Dheker Touati*, Mohamed Raouf Ben Othmane, Fahd Khefacha, Nadhem Khelifi, Anis Belhadj, Ahmed Saidani and Faouzi Chebbi

Omental Infarction (OI) is a rare condition that can mimic common causes of acute abdominal pain, primarily affecting individuals aged 40 to 50, with a male predominance. Imaging techniques like ultrasound and computed tomography aid in diagnosis. Treatment options range from conservative management to surgery, depending on severity and complications. OI often leads t ...

A case report of tubular apocrine adenoma of lower eyelid

Published On: November 04, 2023 | Pages: 005 - 008

Author(s): Michele Altieri*, F Giacomelli and L Anselmi

Moll glands are sweat apocrine glands close to the eyelid margin. Tumors derived from Moll glands are rare, although Moll glands cysts are frequent. They originate from their glandular tissue or tubules. In this report we present a rare case of a lower eyelid skin tubular apocrine adenoma occurred in the right eye lower eyelid of a caucasian 45 year old woman. The le ...

Gastrointestinal Stromal Tumor (GIST) presenting as acute abdomen: Image in surgery

Published On: November 25, 2023 | Pages: 013 - 014

Author(s): Med Dheker Touati*, Marwa Idani, Mohamed Raouf Ben Othmane, Fahd Khefacha, Nadhem Khelifi, Anis Belhadj, Ahmed Saidani and Faouzi Chebbi

Gastrointestinal stromal tumors originating from the small bowel are uncommon. We present the case of a 45-year-old man with no prior medical or surgical history who presented to our hospital's emergency department with abdominal pain, vomiting, inability to pass gas, and no bowel movements. Physical examination revealed abdominal distention and tenderness. His white ...
