Long Term Outcome of Patients with Penile Fracture Undergoing Delayed Repair

Published On: March 21, 2017 | Pages: 032 - 036

Author(s): Rajendra B Nerli*, Vikas Sharma, Amit Mungarwadi, Nitin D Pingale, Ameya T Wagh, Siddharth M Sarnaik and Anvesh A

Introduction: Fracture of the penis is a rare urological emergency which occurs as a result of abrupt trauma to an erect penis. Immediate surgical repair is the standard of care and is superior to nonoperative management due to excellent long term outcomes. ...

The Causes of Jesus' Death in the Light of the Holy Bible and the Turin Shroud

Published On: April 11, 2017 | Pages: 037 - 046

Author(s): Matteo Bevilacqua, Giulio Fanti* and Michele D'Arienzo

Due to the lack of information, the pathogenesis of the death of Jesus of Nazareth is still widely debated. A univocal pathogenesis can be detected by the close comparison between what is reported in the Holy Bible (in particular the four Gospels and the prophetic passages of the Old Testament) and what can be observed on the Turin Shroud (TS). ...

Giant Arachnoid Cyst of Interhemispheric Fissure with Bilateral Extension across Midline Presenting with Seizure after Motor Vehicle Accident: A Serious Acute Post-Traumatic Complications and Management Review

Published On: March 17, 2017 | Pages: 026 - 028

Author(s): Guru Dutta Satyarthee*

Intracranial arachnoid cyst (IHAC) is considered as rare congenital lesions. Usually the arachnoid cyst remains asymptomatic and incidentally picked -up on routine cranial imaging. Mostly, the intracranial arachnoid cyst is located in the sylvian fissure, cerebello-pontine angle, or suprasellar region. ...
