Positive-Effect (PE) of Biomedicines Song with Exercise (BMSWE) fit for Election-Duty (ED)-2026 on Aged Colorectal Major Surgery Chemotherapy (ACRMSCT) Follow-Up Patient (FUP) with Prolonged Side-Effects (PSE)

Published On: June 13, 2026 | Pages: 001 - 024

Author(s): Subhas Chandra Datta*

Introduction: The number of colorectal cancer survivors (CRCS) living with long-term chemotherapy (LTC) follow-up and patient treatment-related complications is rapidly increasing, with about two million new cases of colorectal cancer (CRCC) from 2022, out of two-thirds (2/3) of cancer cases in the world. There are numerous effective remedial approaches for CRCC wit ...
